Bring the Drama Careers Festival

The BBC is supporting a Bring the Drama Festival, to be held across six weeks in Spring 2024, that showcases the many jobs in the creative industries. From stage-managing to lighting and make-up, there will be events across the UK to help people understand more about working in theatre, film and TV.

There will also be a new BBC Two series called Bring the Drama, where untrained actors gain mentoring, training and on-camera experience on the sets of some TV dramas.

Will AI really impact future career opportunities for young people?

A discussion about artificial intelligence (AI) and how it will have an impact on young people's careers. There is potential for new jobs to be created in areas such as data science, website development and coding and AI product creation. The article notes that '... the more children are educated in using technology and rely on low-level AI to increase function right now, the better equipped they will be when finding worthwhile job opportunities in the coming years.'

New jobs, green jobs: planet-friendly roles dominate hiring

LinkedIn data shows that green jobs now make up a third of UK job postings. Some of the fastest-growing green jobs are land acquisition managers, waste management specialists and sustainability analysts.

According to Octopus Energy, it's energy services arm received more than 31,000 applications for about 1,100 roles. Starting salaries for electricians and heat pump engineers range from £32,000 to £38,000 per year, depending on region.

Demand is also growing in electric vehicles. The Institute of the Motor Industry reports that only 39,000 of 168,600 vehicle technicians in the UK are qualified to maintain electric vehicles.
